## Design by Yves Béhar / FuseProject

Fuseproject is an industry leading design and innovation firm led by Yves Béhar. Fuseproject works with founders, executives, and product leaders, to bring “firsts” and category leading products to market. Their world class design team and integrated methodology have delivered an exceptional record of success ranging from start-ups to fortune 100 companies.

Their experience-led approach focuses on using design to change people’s lives, make lives better, and see over the horizon in order to create what’s next.

Yves Béhar graduated from the Art Center College of Design in California, he started out working with high-tech Silicon Valley clients such as Apple and Hewlett Packard, eventually gravitating into the sport, clothing, technology and furniture arenas.

Béhar has been called “the multi-disciplinary designer of our time”. His long list of awards includes the prestigious National Design Award from the Cooper Hewitt Smithsonian National Design Museum, where his work is part of their permanent collection. In 2004 he had two solo exhibitions, one at the San Francisco Museum of Modern Art and the other at the Musée de Design et D’arts Appliqués Contemporains in Lausanne, Switzerland.

**Intuitive and smart design are part of the Fuse DNA.**

#### **Armrest**

Armrests feature a soft PU pad for comfort and the easy to use 'click and forget' ratchet mechanism allows easy height adjustment of the armrest.

#### **V-shaped Back**

The V-shaped back frame and moulded foam seat cushion provides a comfortable and ergonomic sitting experience.

#### **3D Knitted Fabric**

3D Knitted fabric covers the entire backrest providing elastic support, whilst the triangular pattern provides excellent breathability and sophisticated design.

#### **Drafting**

Available as drafting chair with chrome footring.

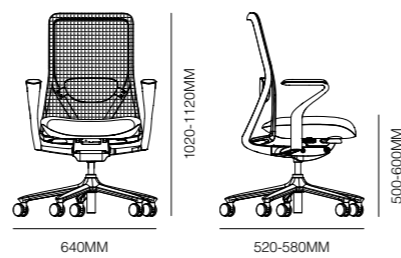

#### **Headrest**

An optional adjustable headrest enhances upper-body support, promoting healthier posture during extended periods of sitting.

# A uniquely designed chair for modern workspaces

## Specifications

## Standard

- Gas height lift
- Synchro German "Bock" Mechanism
- Ratchet adjustable arms
- Back tension
- Adjustable lumbar
- Seat slide
