Terra

Design by
Claudio Bellini

Design by Claudio Bellini

Inspired by the Möbius strip, Terra's design features elegantly curved armrests with continuous twists, creating the impression of an infinite loop in motion. Its streamlined lines enhance both visual appeal and structural stability. Rounded, enveloping forms and vibrant finishes give Terra a playful, youthful character, making it equally suited to workspaces and home offices. Beneath its simple, inviting shape lies a carefully considered study of ergonomics and comfort. The supportive padded backrest and intuitive free-tilt mechanism move naturally with the user, creating a relaxed, weightless sitting experience that promotes wellbeing throughout the day. A perfect combination of intelligent, practical and attractive design.

Specifications

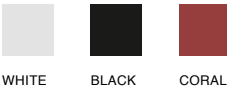

570W x 620D x 775-865mm H
420-510mm SH
